- ✎ MPE points PETROBRA'S for crime in the JECrim*
- ✎ INTERSTICE: Workers win PETROBRA'S in 1º Round*
- ✎ Attention: Workers must be intent to the new invocations*

## MPE points PETROBRA'S for crime in the JECrim

The Public prosecutor's office of the Environment of the Judicial district of Salvador of the State Public prosecution service of the State of the Bahia, points the Landufo Refinery Alves, next to the Criminal Special Court, with respect to the cometimento of misdemeanor for the metal launching heavy causing contamination of clams and adoecimento of workers, what, in accordance with the Federal Law number 9,605/98, foresees the detention or fine of the responsible

one (MPE/BA P.P. 003.1.13899, 2007). The Criminal Special Court (JECrim), foreseen in Law 9,099/95, will be calling the responsible ones to give clarifications about the representation offered for the together AEPETRO to the MPE.

For the AEPETRO, the confinement it would be indicated in these situations, therefore it would serve of example for other managers who are, or had been, adopting behaviors in disagreement with the ambient licenses or that they cause damages to the environment or

the health human being. In the measure where the breaking twig officially is forbidden, silence, the secret them agents, who fear to be surprised, to be denounced or to be punished, is, perhaps, in certain cases, useful good to commands, therefore, if it knew at every moment of everything, would be obliged, well of the order, considerably to reduce the rhythm of the execution of the work (Dejours, 1994).

## Meeting on mercury will count on the participation of the AEPETRO

The invitation of the ACPO - Association of Combat to Persistent the Organic Pollutants, the AEPETRO will be participating of the REGIONAL MEETING FOR SENSITIZATION OF the CIVIL SOCIETY ON ACTION FOR ELIMINATION OF the MERCURY USE AND EMISSION.

The event happens in days 26 and 27 of November, in the College of Public Health of the USP, and will be being carried through for the ACPO, Association of Expostos and Intoxicados for Mercúrio Metálico (AEIMM) and Association of Protection to the Environment of Cianorte (APROMAC). Account with the support of the Coordination of Monitoring in Ambient Health -

CGVAM/MS, Zero Mercury Working Group - Zero Mercury Campaign, Sigrid Rausing Trust and the European Commission saw the European Environmental Bureau, College of Public Health of the USP and National Program of Mercury.

Our Director, Leninha, the exposition experience will be composing a table of debates placing the chemical agents for workers of the PETROBRA'S system. The mercury is classified as a occupational contaminante, being the pulmonary way, through the inhalation of vapors of the same, the main form of occupational exposition. The organic form is most toxic, easily absorbed for the gastrointestinal treatment. Independently of its chemical form, the

metal mercury crosses the placentária and hematoencefálica barrier quickly, tending if to accumulate in the brain. The metal mercury and its composites can cause some damages to the health of the workers and the environment. In relation to the health of the workers, the mercury can cause a picture of acute poisoning (exposition short term), or a picture of chronic poisoning (exposition in the long run) (SOUZA, 2006).

Justiça Tarda, más não falha!

### Attention: Workers must be intent to the new invocations

During the beginning of November, new actions pleading denied labor laws, will be being appreciated for the Justice of Amaro Saint, responsible judicial district for the lawsuits against the RLAM PETROBRA'S in 1º Instance. The colleagues must be intent the invocations and they do not have to lack in the first hearing, face to the filling of the lawsuit next to justice of the work.

The minimum interval of 11 hours between hours of working is foreseen in art. 66 of the CLT, having been used in the RLAM in July of 2005, only after the guiding of the demand for then the Representative one of the Employees in Social Responsibility, Wanderley Júnior, currently considered 2º bigger benefit of the category, after the implantation of 5º group.

The RLAM, however, did not want to assume the liabilities foreseen for the not of the CLT, what it made diverse workers to search the AEPETRO to be filing a suit its actions individually. At the beginning of October, processes 01169 and 01171 had been directed for 2º Instance, to be judged for the reporter of 2º Group, Dra. Débora Machado, has seen the resource petitioned. The expectation is of new victory for the workers in 2º round.

Of the processes directed for AEPETRO, only, 00088 and 00089, they had been not yet sentenced, therefore, they are it are of guideline waiting that the secretariat of the Pole of Amaro Saint,

certifys the order of desistance of the actions moved for the Union, what, only goes to delay the judgment of the process, however will not affect the decision and the period of the initial of the action.

Costum to say until the dignity human being depends in very on the work. But nobody lives to work. The necessity of limitation of the day is established in requirements of biological, social order and economic, therefore, it has as objective, not only the combat to the decurrent problems of the fatigue, but it also aims at to make possible to the worker a healthful familiar and communitarian conviviality, being still an important instrument of combat to the unemployment and improvement of the productivity. From there, the importance that must be conferred to this question.

### Workers debate world-wide crisis of the Capitalism

The AEPETRO was present in the debate "the END OF the CAPITALISM: Reflections on world-wide the economic crisis!", with the participation of the Dr. in Economic Sciences for the UFBA and Professor of Economy of the UNIFACS, Fernando Pedrão and, also, the Journalist, Scientist Politician and International Secretary, Jose Reinaldo. The debatedores had been emphatical on the mobilization necessity syndical politics so that the responsibility of the crisis of the Capitalism does not fall again on the workers. It does not have doubts how much to the confrontation of a hard crisis, based on the ostentation of powers, the example of U.S.A., that is in economic decline in function of the raised costs for the military maintenance, that guarantees the

offensive imperialista for covets of the natural resources in the too much countries. It was cited, also, the discovery of the concomitant daily pay-salt with the reactivation of 4º American fleet, that keeps vigil on the Atlantic. The debatedores had also left clearly that the crisis already came being announced, as well as, its main causes, as: the exacerbado consumption of the energy of the planet; the military cost for ostentation of the world-wide potentials, e; the financeirização of the capital, in special, the real estate market. The crisis is of the proper capitalist system that induces the consumption for the stimulator to the credit, where if cannot leave to evidence the maken a mistake economic policy of Brazil, mainly for the measures of the Central banking, how much to the raised taxes of interests. The debate was carried through by the Central office of the Workers and Workers of Brazil, CTB - Bahia, counting on the support of the CES - Center of Syndical Studies.
